

AXDN08SH

DINrail Mount 8 Input Lighting Control Module

Key Features

- Compact DINrail design for installation in centralised panels or distributed enclosures
- Software programmable (accommodates building tenant changes)
- Compatible with occupancy & absence sensing, daylight sensing and timed override for energy conservation and carbon reduction
- Eight inputs each with terminal and RJ12 connectors for connection of wall switches, occupancy, absence, daylight and combined sensors, IR sensors, solar sensors and emergency test key switches
- Multiple scene setting

Overview

This input module is available as a standard DINrail mounting device for up to eight separate inputs.

Supported inputs include presence, solar and combined sensors including infra-red sensors, wall switches and emergency test switches.

DINrail LCMs are ideal for use in areas where the electrical installation is fixed or where the use of centralised panels of controllers is appropriate. When used together with Greengate Area Controllers, the units create a flexible, networked, lighting control solution. Groups of luminaires and sensors or switches may be created and then controlled on the basis of occupancy, absence, daylight level or user override.

Each LCM is software upgradeable, no additional cards or equipment need be purchased.

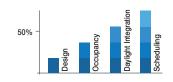

This input module may also be mounted in a steel enclosure (ordered separately) for mounting within a distributed LCM network. Order Code: MTG22DN1

Code Compliance

- Improves BREEAM & LEED scoring for building sustainability.
- Contributes to energy reduction targets under Climate Change Levy (CCL) and Carbon Reduction Commitment (CRC).
- Qualifies for Enhanced Capital Allowance (ECA) applications.
- Delivers lighting control requirements under UK Building Regs - L2a & L2b and BRE: 498.

Achievable Energy Savings

Suitable For

Cellular office

Open plan office

School classroom

Lecture theatre

Consulting room

Meeting room

Hospital wards

Retail complex

Public library

Sports hall

Airport terminal

Factory production area

Workshops

Foyers & atriums

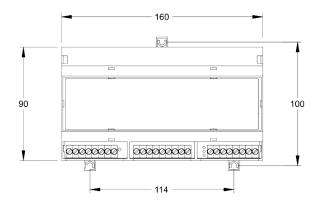

Corridor & staircases

Lift lobbies

Plant room

Storeroom

Dimensions

Additional Features

Internal LED Indicators

For ease of maintenance, showing network status and power

supply status. Program Port

For software upgrade or introduction of bespoke program.

Technical Information

Construction: Plastic house UL94 V0 rated Dimensions: 160 x 90 x 58mm (L: x W x H)*

Fixing:

35mm DINrail mounting or panel mount with 3 x 3.5mm

Diameter at Centres 114 x 100mm (L x W)

Weight: 665g

Temperature: 0 to 450C (non condensing)

Supply: 230V~AC 50Hz single phase Load data: Max LCM input load - 65mA

* This module can also be supplied in a folded steel enclosure with 20mm knockout entries on three sides for conduit wiring. Please contact Greengate for details.
